

Vikram Rao

vikram.rao@example.com | +91 90000 10003 | Hyderabad, India

PROFESSIONAL SUMMARY

Backend engineer with experience designing data-heavy services, APIs, and asynchronous processing systems.

EDUCATION

B.Tech in Computer Science, IIT Hyderabad — 2023 | 8.9 CGPA

EXPERIENCE

Backend Engineer — CloudHarbor Systems (2023–Present)

- Designed Python and FastAPI services handling high-volume transaction workflows.
- Introduced Celery-based asynchronous processing and PostgreSQL indexing strategies.
- Built monitoring and alerting workflows using Prometheus and Grafana.

PROJECTS

LedgerFlow | Python, FastAPI, PostgreSQL, Celery, Docker

- Built a transaction processing service with idempotency, background jobs, audit logs, and retry handling.

TECHNICAL SKILLS

Python, SQL, Go, FastAPI, Django, PostgreSQL, MySQL, Redis, Celery, Docker, Kubernetes, AWS, Linux
